The image is a horizontal banner representing the solar system. On the far left, a small yellow circle represents the Sun. Following it is a series of colored ovals representing the orbits of the planets: Mercury (orange), Venus (light green), Earth (yellow), Mars (dark teal), Jupiter (blue), Saturn (teal), Uranus (green), and Neptune (light green). A horizontal dashed line starts at the Sun and extends across the diagram, labeled "8.5 AUs" above the Earth's orbit. A blue rocket ship with a white window and a white base is positioned on the yellow line, pointing towards the right. The background has a soft, blurred gradient from orange on the left to red, then green, then blue on the right. At the bottom left, there is a large, semi-transparent white text area containing the words "The Earth" and a green triangle pointing to the right.

The Earth
